

BPM730 Antenna Specification

General Description

The antenna is specifically for bluetooth mouse application. Its operation is in 2.4GHz band. The antenna type is meander stripe PCB antenna similar to those of the F-antenna.

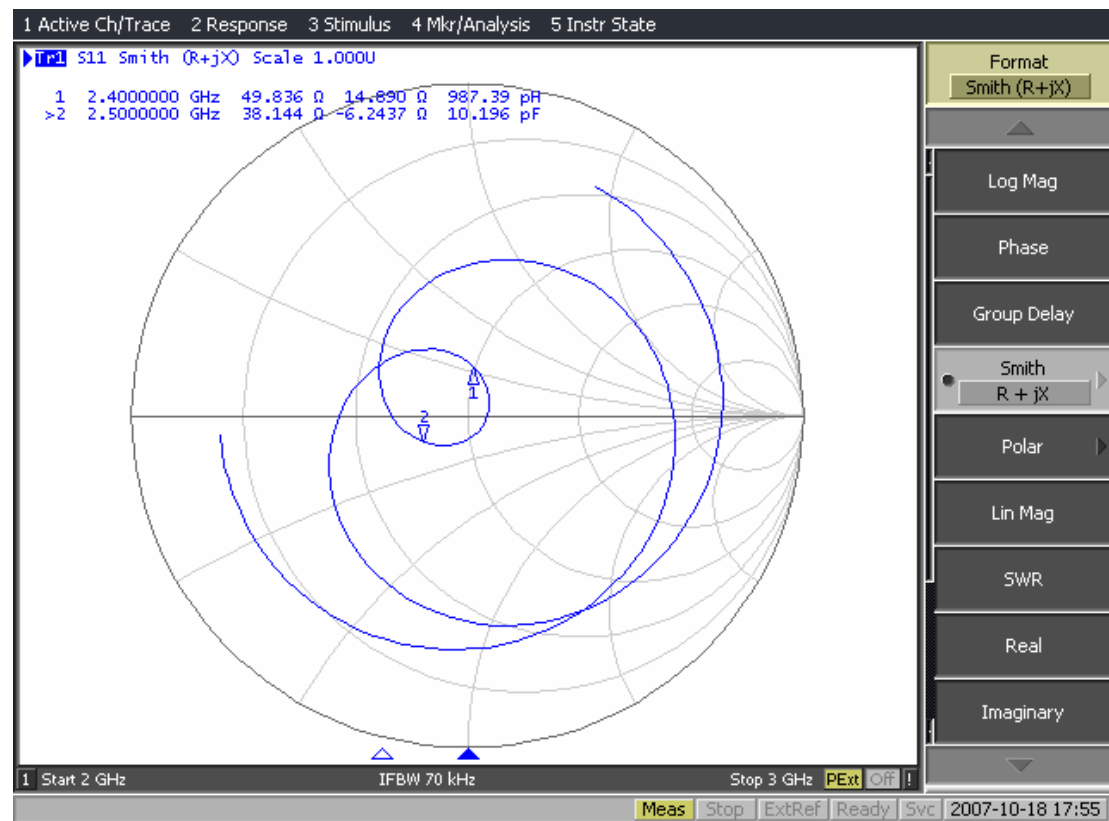

Features

- * Operating frequencies: 2.4GHz ~ 2.4835GHz
- * Antenna average gain: -3dBi. @2.450GHz
- * For Bluetooth Mice application

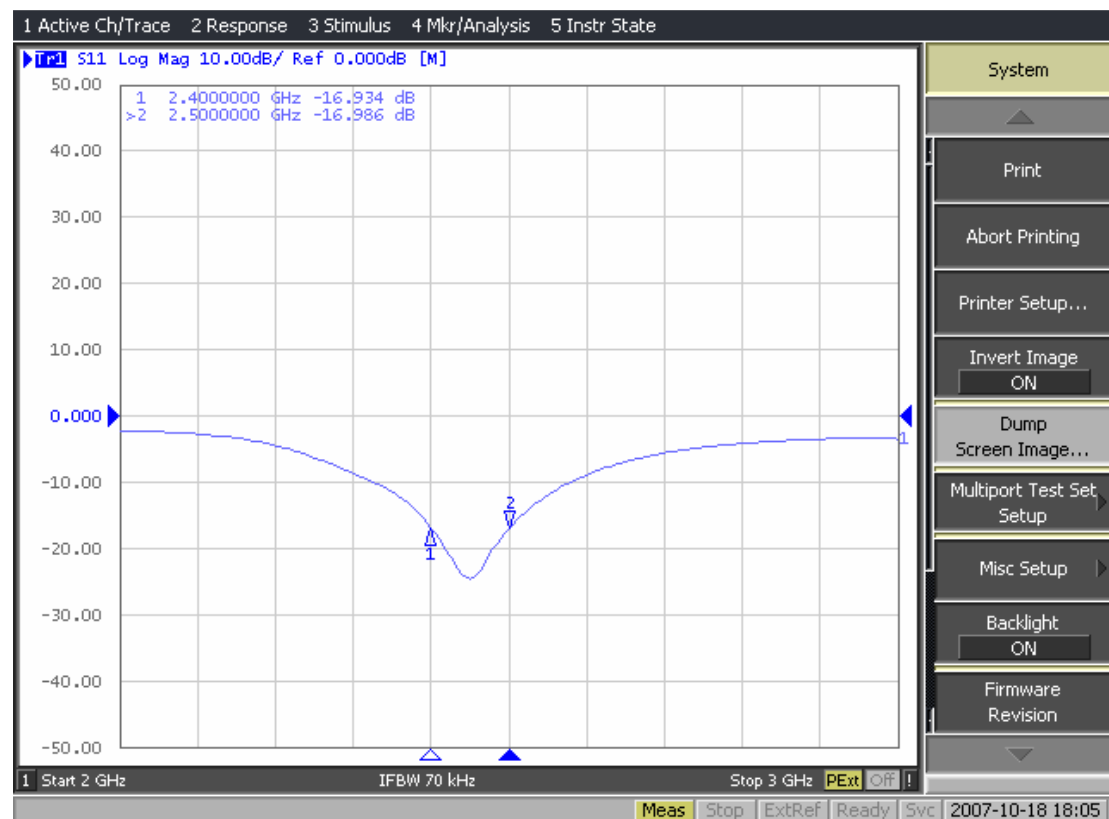

Antenna Electrical Characteristic:

- * Input VSWR: 1.5:1
- * Max gain: 1.07dBi @2.450GHz
- * Polarization: Horizontal/Max
- * Operating frequencies: 2.4GHz ~ 2.4835GHz

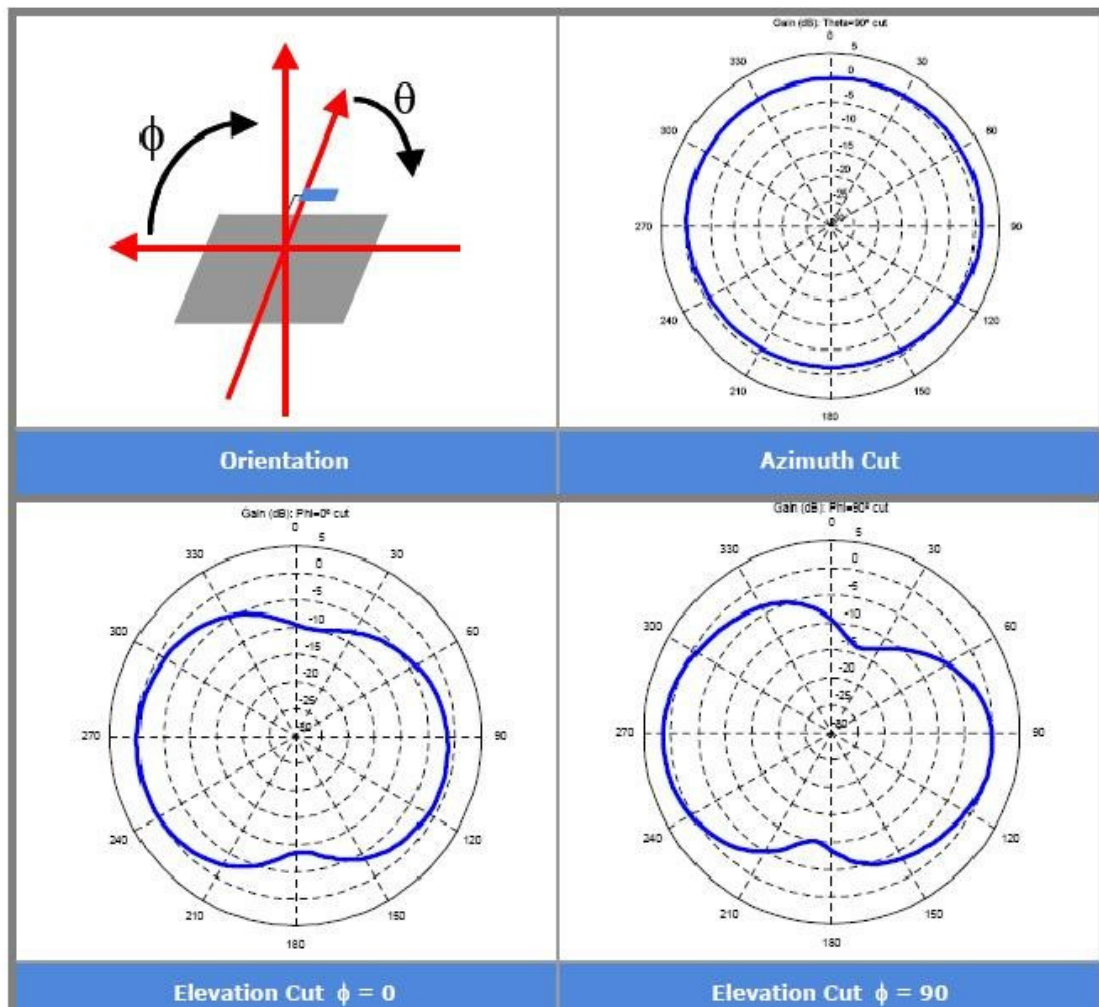

A. S11(Smith chart)

B. S11(Return loss)

C. Radiation Characteristic

Peak gain : 1.07dBi

Average gain : -3dBi
